

Catalog 2019

human hair wigs

A year rich in novelties especially in the posticeria for clients of oncology and alopecia. In this catalog we present all the natural wigs of our current collection in production, highlighting the different types of internal finishes that the same wig model can have. From a simpler and cheaper machine manufacturing, through hand-made details such as crown or tulle stripes or part, to the finishing of the highest range of "whole tull", for a more realistic, transparent scalp effect. Lighter, more flexible and more breathable than the classic "monofilament", it is possible to comb the hair sideways to the desired side or even completely backwards for those who do not prefer a bangs or too much hair on the forehead.

Personalized preparation according to measures in case of oncology clients, when frequently with the loss of hair the volume of our head changes and not always a standard size, even elastic may be correct ..

We also present the new line of crowned bangs profiles, a valid alternative that allows you to rest from the wig at home and / or in informal environments (beaches, swimming pools, etc.)

And once again, with pride, it should be noted that if you buy a natural wig from TuPeluca.com you are buying a product made in Spain

110 different models (if we have not lost the account ..) more than 10 colors to choose in each of them for all types of women who should not give up their image because they have to conform to the limited or limited choice found in general when looking for something as concrete as undetectable .. And above all available TODAY (in stock) for you in 24 hours.

If you are looking for a quality natural wig, it is very likely that we have yours.

COMFORTABLE CAPS

Closed cap construction with breathable fine holes of a very flexible and soft texture which do not suffer so much trouble in the scalp with strip chafing internal hair and elastic.

High part made with tulle transparent to the skull simulating our scalp. An extra thin, flexible and breathable tulle.

CUSTOM MADE

WIGS MADE IN **SPAIN** WITH HAIR NATURAL OF THE BEST QUALITY

The prices published in this catalog (as of July 10, 2019) cancel and replace those of any other publication Previous, as well as other offers online or present on social networks and / or other media that may exist. Being able to be subject to variations during the year, in case of any conflict or doubt they will always be exclusive and imperatively valid on any other price, those of our online store. Shipping and possible taxes NOT included.

Pelucas confeccionadas a medida

QUE SEA UNA NECESIDAD o UN CAPRICHIO DA IGUAL..

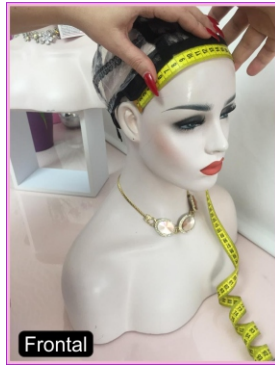

Queremos que estés cómoda y a gusto con tu peluca

Estimado cliente,

la importancia de llevar una peluca cómodamente no solo se halla naturalmente en la calidad de los materiales que la componen tales como el cabello, (sea natural o menos), sus partes textiles, gomas, ganchos, frontales protectores, el acabado del contorno de la oreja flexible, etc.. No hay nada más importante que una confección a medida que tenga en cuenta la forma de tu cabeza, que te haga sentir segura y que no te "agobie" en la medida de lo posible, algo no siempre resumible a una talla "S", "M" o "L".

Nuestro taller de confección realiza la importante labor de preparar una peluca con las medidas exactas del cliente, sobre todo cuando este, por motivos de salud, ha perdido o va a perder el pelo. En estos casos, el volumen global de la cabeza se reduce considerablemente con respecto a cuando compramos la peluca aun teniendo pelo por ejemplo.

A continuación publicamos las medidas tal como deberán tomarse para asegurarse una talla personalizada y anatómica con el fin de que el resultado de la compra sea altamente satisfactorio, algo no siempre tan posible cuando compramos una peluca en una peluquería o por Internet sin saber de donde viene o si este servicio está garantizado con la compra..

CUSTOM MADE WIGS: need or whim it doesn't matter, we want you to be comfortable with your wig

Dear Customer,

The importance of wearing a wig comfortably is not only naturally found in the quality of the materials that make it up hair, (natural or less), its textile parts, rubber bands, hooks, protective front, the finish of the flexible ear contour, etc.

There is nothing more important than a confection as you consider the shape of your head, make you feel safe and do not "stress" as much as possible, something not always summarizable to a size "S", "M" or "L".

Our workshop carries out the important task of preparing a wig with the exact measurements of the client, especially when this, for health reasons, have lost or will lose your hair. In these cases, the overall head volume is greatly reduced with regarding when we bought the wig even having hair for example.

Above we publish the measures as they should be taken to ensure a personalized and anatomical size so that the purchase result is highly satisfactory, something not always as possible when we buy a wig at a hairdresser or online without knowing where it comes from or if this service is guaranteed with the purchase ..

Elige el acabado interior de tu peluca

En las paginas anteriores hemos presentado el precio de cada peluca disponible según la confección con la cual pueda realizarse. Podemos confeccionar tu peluca toda a maquina, con TOP de tul transparente, o incluso con raya o coronilla de tul transparente como efectos mas realistas. El precio de la misma peluca dependerá del acabado interior que elijas:

Choose the inside finish of your wig

In the previous pages we have presented the price of each wig available according to the preparation with which it can be made. We can make your wig all machine, with transparent tulle TOP, or even with transparent tulle stripe or crown as effects more realistic. The price of the same wig will depend on the interior finish you choose:

Opcional: acabado laterales de tul

Tambien podemos hacertelo - We can also do it to you

Optional: lateral tulle finish

ONCOLOGIA POR QUE NO?

INTRODUCIR UN ESPACIO EN MI SALÓN

Lamentablemente cada vez son mas las personas que padecemos la enfermedad sometienndonos a tratamientos severos que nos hacen caer el cabello. Cuantas veces habrá venido a tu salón alguna cliente de toda la vida con este problema? No lo dudes ademas de ayudar a tus clientes, será una nueva fuente de ingresos para tu salón.
